

Early-Career Analyst

An early-career profile made specific and credible using coursework, placements and tooling instead of borrowed seniority language.

BEFORE — ORIGINAL WORDING

— **Headline:** Graduate seeking opportunities

— **About:** Recent graduate with a degree in Economics. Hard-working, quick learner, good team player. Looking for a role in finance or analytics.

AFTER — REPOSITIONED BY MARVEL CAREER SOLUTION

- **Headline:** Data & Business Analyst | Economics Graduate | SQL, Python, Power BI | Financial Services
- **About (opening):** I turn messy operational data into the two or three numbers a team can actually act on.
- **About (evidence):** Twelve-month placement in a retail bank's reporting team, automating a weekly branch performance pack in SQL and Power BI and cutting preparation from a day to under an hour.
- **About (close):** Currently deepening Python for forecasting work. Open to analyst roles in financial services and consultancy.

WHAT CHANGED AND WHY

- 'Seeking opportunities' replaced with a role identity and a named toolset.
- Placement work written as delivered outcomes rather than duties.
- Claims kept proportionate to experience — credibility, not inflation.

This preview illustrates the positioning approach Marvel Career Solution applies to resumes, CVs and LinkedIn profiles. Names, employers, locations and identifying figures have been changed or generalised. Your own documents are written entirely from your experience, for the market you are targeting.
